It is also expected that 82% of medium and large enterprises in the kingdom Using the Internet of things in its business activities in the top 3 motivators :

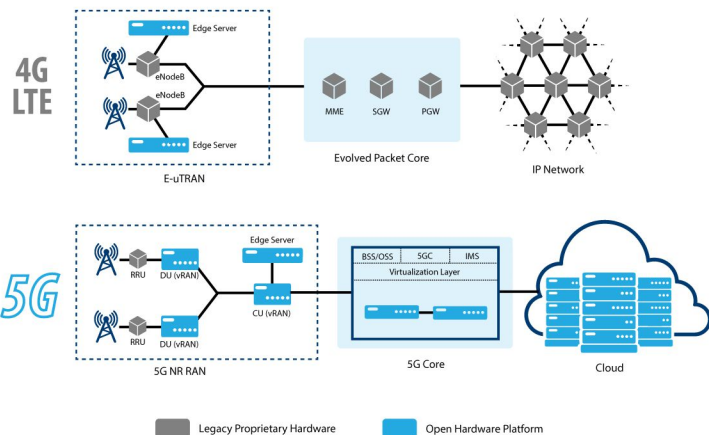

Improve production efficiency

Improve customer service

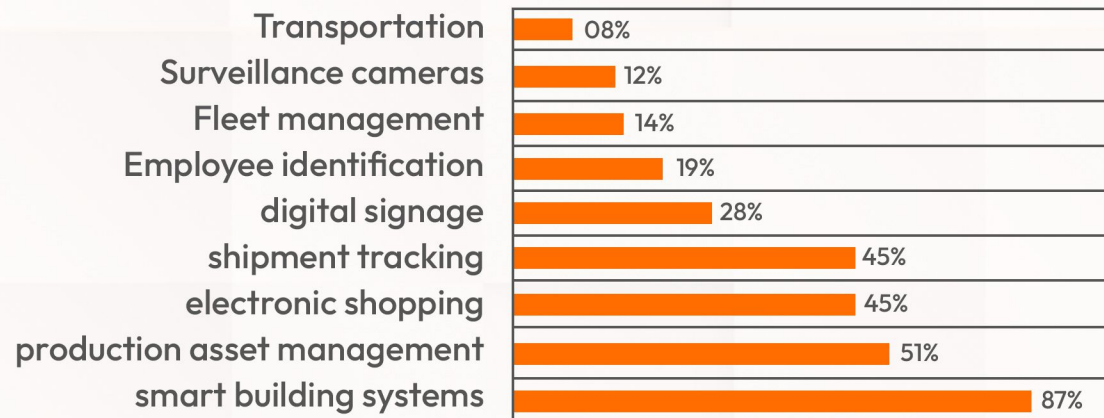

Enhanced security

Factors influencing the implementation of the Internet of things strategy

The best implemented use cases for the Internet of things

The Size of The Internet of Things Market in Saudi Arabia

The best implemented use cases for the Internet of things

Empowering Data Center's

- The volume of investments in data center amounted to about 18 billion dollars in 2022
- Due to the excellence of Saudi Arabia in an attractive environment for the construction of data centers through a highly reliable and cost-effective energy infrastructure commensurate with global requirements Increasing data center facilities
- The number of employees in the field of telecommunications and information technology has reached by the end of 2022 to 340 thousand jobs, the percentage of women's participation of which is 33 % With a localization rate of about 60%
- **The kingdom targeted the following**
 - Data center Construction of 1300 MW of Capabilities by the year 2030
 - Green Power Securing 50% of the kingdom's domestic energy needs From renewable energy sources through “ Green Saudi Arabia “ initiative
 - Cloud computing reduced tariff for electrical energy has been issued, which is 0.048 dollars/kWh for cloud computing data centers

The Volume of Demand For The Cyber Security Market in Saudi Arabia

- The global cyber security industry is expected to be worth USD 366.10 billion by 2028.
- The cyber security market in Saudi Arabia is expected to witness a compound annual growth rate of 12.4% between 2020 and 2026 due to Saudi Arabia's efforts to support the strengthening of digital infrastructure and digital transformation within Vision 2030.
- The size of the cyber security market in Saudi Arabia reached 5 billion riyals in 2023 with a growth rate of more than 14%, which exceeds the global level.

The percentage of growth in spending on cyber security in the kingdom

cyber threats in 2023

 Therefore, it is an attractive field for entrepreneurs

 The costs of Saudi losses 6.5 Million dollars

 The number of cyber attacks on companies 22.5 Million Cyber Attacks

 Saudi Arabia witnessed a 19% decrease in the number of cyber threats in 2023

 The average annual cost of cybercrime has increased up to 18.5 million US dollars

 Banks across the kingdom are increasingly investing in modern technologies

The Volume of Spending on **Information Technology** in Saudi Arabia

- Saudi Arabia accounts for more than 57% of the total telecommunications market in the Middle East and 53% of the IT industries.
- The total spending in the IT sector is increasing in the Middle East and North Africa, where the total market registered about USD 170 billion in 2023 , and the largest spending rates were concentrated on the following services.
- The compound annual growth rate of the software market reaches 11 % , as the domestic market for application development and deployment during the current year reached 651 million dollars.

THE TOTAL SPENDING IN THE IT SECTOR	
Sector	Revenue of Information services activities"
Telecommunications services	112.5 B
Telecommunications devices	28 B
IT devices	151.3 B
Software	9.6 B
Data center systems	3.4 Bb

IT MARKET REVENUES BY ACTIVITY		
Years	Revenue of Information services activities	Revenue of Computer coding, consulting and related activities
2022	135.9 M	1.50 B
2023	149.1 M	1.65 B
2025	151.3 M	1.66 B

The Strategic Objectives of The Kingdom's **Vision 2030** in The Field of ICT

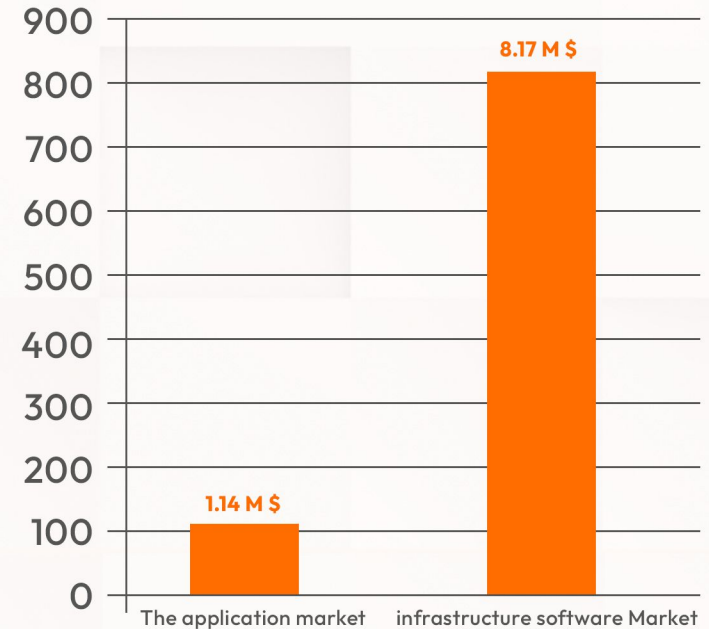

The Volume of Spending on **Information Technology** in Saudi Arabia

→ The Big Data and AI market in Saudi Arabia is segmented by :

- Solution : (Hardware, software, solutions)
- Industry vertical : (ICT, retail, public and government institutions, BFSI)

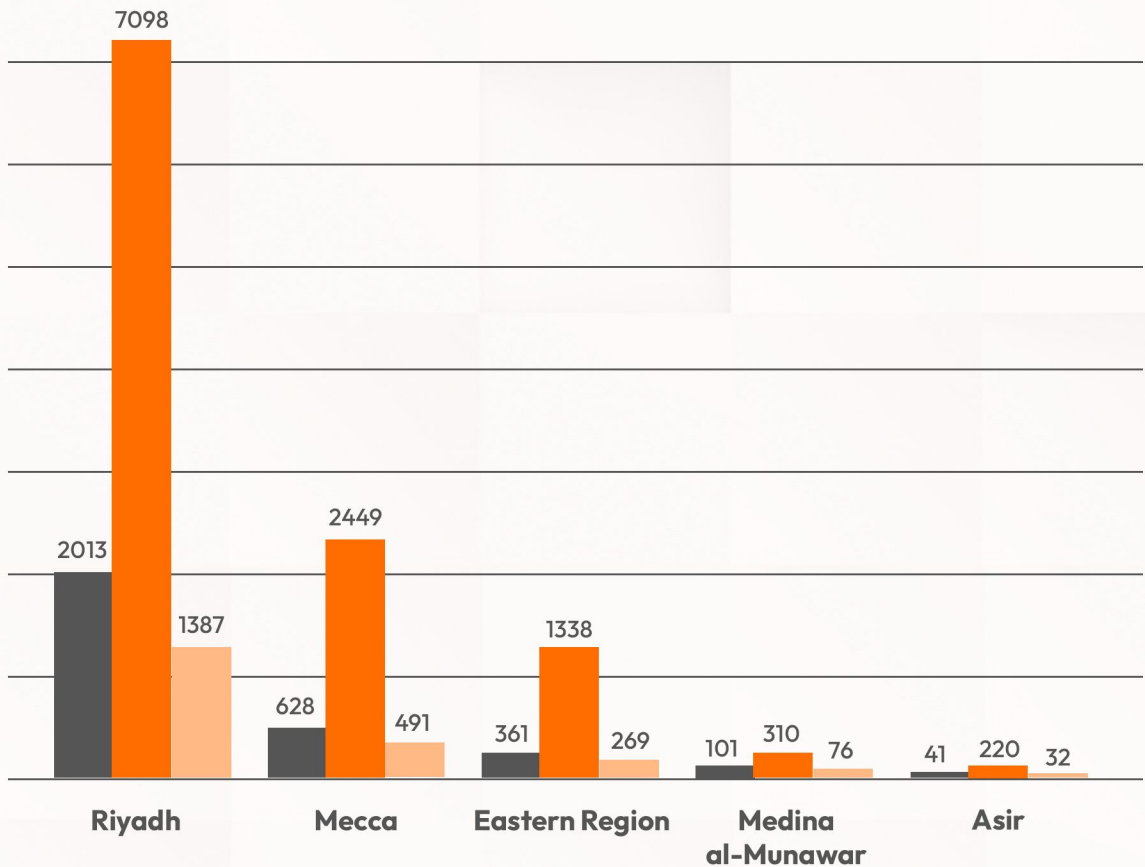

→ The Saudi Arabia Big Data And Artificial Intelligence Market size is estimated at USD 0.38 billion in 2024, and is expected to reach USD 2.19 billion by 2029, growing at a CAGR of 34.24% during the forecast period (2024-2029).

→ Mainly due to the growing adoption of data-based AI solutions and developments in machine learning, which enhance market growth opportunities.

IT MARKET REVENUES BY ACTIVITY

Analysing The Size of The **Artificial Intelligence Market** in Saudi Arabia

The number of Commercial Registers in the administrative regions according to the different sectors

■ Ai Records ■ Computer programming Records ■ Robotics Records

Analysing The Size of The **Artificial Intelligence Market** in Saudi Arabia

Software

The existing commercial records of the software sector amounted to about 4 thousand records by the end of the fourth quarter of 2023, compared to 3.1 thousand in the same period of 2022, with a growth rate of 28%.

Visual Arts

With regard to visual arts activities, the number of existing business registers by the end of the fourth quarter reached 822, a growth of 103%, year-on-year.

Cloud Computing

It turned out that the number of existing records in the provision of cloud computing services reached by the end of the fourth quarter about 1.7 thousand records, compared to 1.2 thousand in the same period of 2022 with a growth of 40%.

According to the General Authority for Statistics (Saudi Arabia), by 2024, the computer, electrical and optics industry in Saudi Arabia is expected to generate approximately \$231.7 million in sales

The Strategic Objectives of The Kingdom's **Vision 2030** in The Field of **Data And Artificial Intelligence**

Training about 40% of the total workforce on the basic skills of data literacy and artificial intelligence

Providing about 15,000 specialists and Training of about 5,000 experts in the field of data and artificial intelligence

Motivating about 300 startups in data and artificial intelligence

Attracting foreign investment worth about SAR 30 billion and Establishing local investments of up to SAR 45 billion

Join the list of top 10 countries in open data indicators and Be the top 20 countries in the indicators of artificial intelligence data

Significant progress in environmental and legislative aspects
